

FEEDPro

The Industry's Leading Swine Research Solution

Intelligent Feed Delivery

The core of the FEEDPro system is an intelligent feed Delivery Unit. Precise amounts of feed are automatically loaded and can be delivered to any feeder in any quantity. Multiple diets can be managed.

Powerful Software

FeedPro includes control software which makes it easy to set up and manage trials which follow correct protocols. System dashboards and quick reports provide the user with management tools to monitor behavior and gain insights as trials progress.

Remote Monitoring & Automated Data Collection

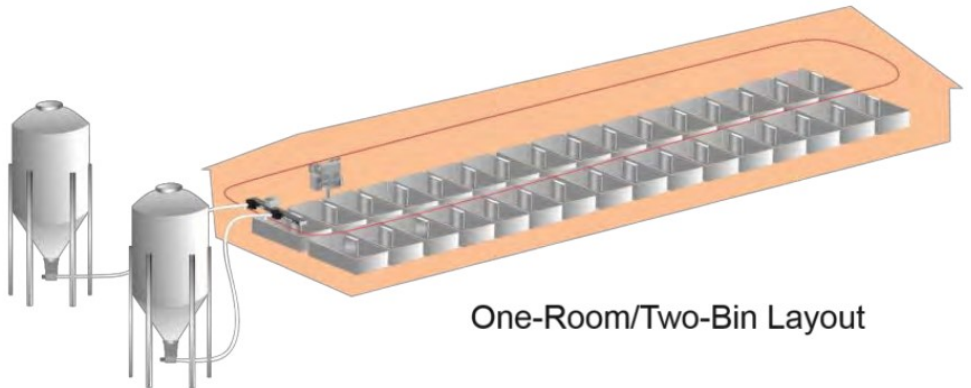

Users with Internet access can check on system status or download data at any time.

Custom Design

Rail layouts suited to the design of your building.

Easy Installation

FEEDPro can be installed in new or existing buildings with limited structural modifications.

One-Room/Two-Bin Layout

Payback

- Reduced labor cost per trial
- More trials possible in shorter time
- Uncover money-saving feeding strategies which can be applied in other barns.
- Ability to test equipment performance (feeders, waters, etc.) before committing to large scale purchases.
